

# ICE SHEETS AND GLACIERS IN THE CLIMATE SYSTEM

13-24 September 2011, Karthaus (northern Italy)

A course sponsored by

The Institute for Marine and Atmospheric Research, Utrecht University, the Netherlands  
The Niels Bohr Institute, University of Copenhagen, Denmark  
Ice2Sea project, European Union

## ***Scope and Participation***

The course provides a basic introduction to the dynamics of glaciers and ice sheets with a focus on ice-climate interactions.

Topics include: continuum mechanics, kinematics, ice rheology, sliding and hydraulics, numerical modelling, polar meteorology, ice-ocean interaction, ice cores, interaction of ice sheets with the solid earth, glacier fluctuations, etc.

Lectures will be given in the morning and exercises (including computer projects) in the afternoon. An excursion will be organised to nearby glaciers. The course is meant for Ph.D. students that work on a glaciology-related climate project.

Some places are available for junior scientists.

The registration fee is 400 Euro. This includes lodging, full board, excursions and course material.

**Lecturer include:** T. Blunier, M. van den Broeke, Ch. Buizert, O. Eisen, A. Fowler, R. Giesen, H. Gudmundsson, A. Jenkins, G. Milne, F. Paul, Th. Moelg, A. Stroeven, A. Vieli, R. van de Wal, J. Oerlemans (*convenor*).

## ***Application***

Send your application to the convenor (j.oerlemans@uu.nl), before **9 May 2011**.

You will be notified about the decision of the Selection Committee by 10 June 2011.

Your application should include:

- A statement why you want to participate in this course
- Affiliation, name of supervisor
- A description of your research project (~200 words)
- A curriculum vitae

Please supply this information as **a single PDF file**.
