

Karthaus 2026 Farewell song by the students
(based on: fly me to the moon by Frank Sinatra)

Fly me to the field
Because my supervisor wont
Let me see what firn is like
On greenland and on mars
In other words
Fly me north
In other words
Darling fund me

Fill my life with snow
Let me model forever more
SIA is all i long for
All I worship and adore
In other words
Give me sliding laws
In other words
Run my model

Fly me to the field
Let me simulate the flow
Let me see what ice is like
On antarctica and mars
In other words
Send me south
In other words
Darling fund me

Fill my life with firn
Let the grounding lines return
Glaciers are all I long for
And inclusive field work more
In other words
Please fund me
In other words
We thank you
